1890s
Starting from Scratch
 Purchase of Marunouchi Land and Vision of a Major Business Center

The history of Tokyo's Marunouchi area began in 1890 when Yanosuke Iwasaki purchased the area at the request of the Meiji government of Japan. At the time, the area was an expanse of flat, grassy fields that became known as Mitsubishigahara, or Mitsubishi Fields. Iwasaki's reasoning behind this acquisition was his belief that for Japan to become a modern nation, the country needed a business center such as that of New York or London. The purchase price was ¥1.28 million, about three times Tokyo's annual budget at the time—a massive sum that speaks to the boldness and inspiration of Iwasaki's decision.

1890s – 1950s
First Phase of Development
 Dawning of a Full-Scale Business Center Development

The construction of the area's first modern office Building, Mitsubishi Ichigokan, was completed in 1894. Soon after, three-story redbrick office Buildings began springing up, resulting in the area becoming known as the "London Block." Following the opening of Tokyo Station in 1914, the area was further developed as a business center. American-style large reinforced concrete Buildings lined the streets. Along with the more functional look, the area was renamed the "New York Block."

1960s – 1980s
Second Phase of Development
 An Abundance of Large-Capacity Office Buildings Reflecting a Period of Rapid Economic Growth

As Japan entered an era of heightened economic growth, there was a sharp increase in demand for office space. Through the Marunouchi remodeling plan that began in 1959, the area was rebuilt with large-scale office buildings, providing a considerable supply of highly integrated office space. Sixteen such buildings were constructed, increasing the total available floor space by more than five times. In addition, Naka-dori Avenue, stretching from north to south through the Marunouchi area, was widened from 13 meters to 21 meters. The 1980s marked the appearance of high-rise buildings more than 100 meters tall in the area. However, even amid this changing skyline, the Marunouchi area remained a business center with beautiful scenic views of the waters and green woods of the Imperial Palace.

1998 – 2019
Third Phase of Development
 (First and second stage of redeveloping Marunouchi)
 The World's Most Interaction-Inspiring Neighborhood

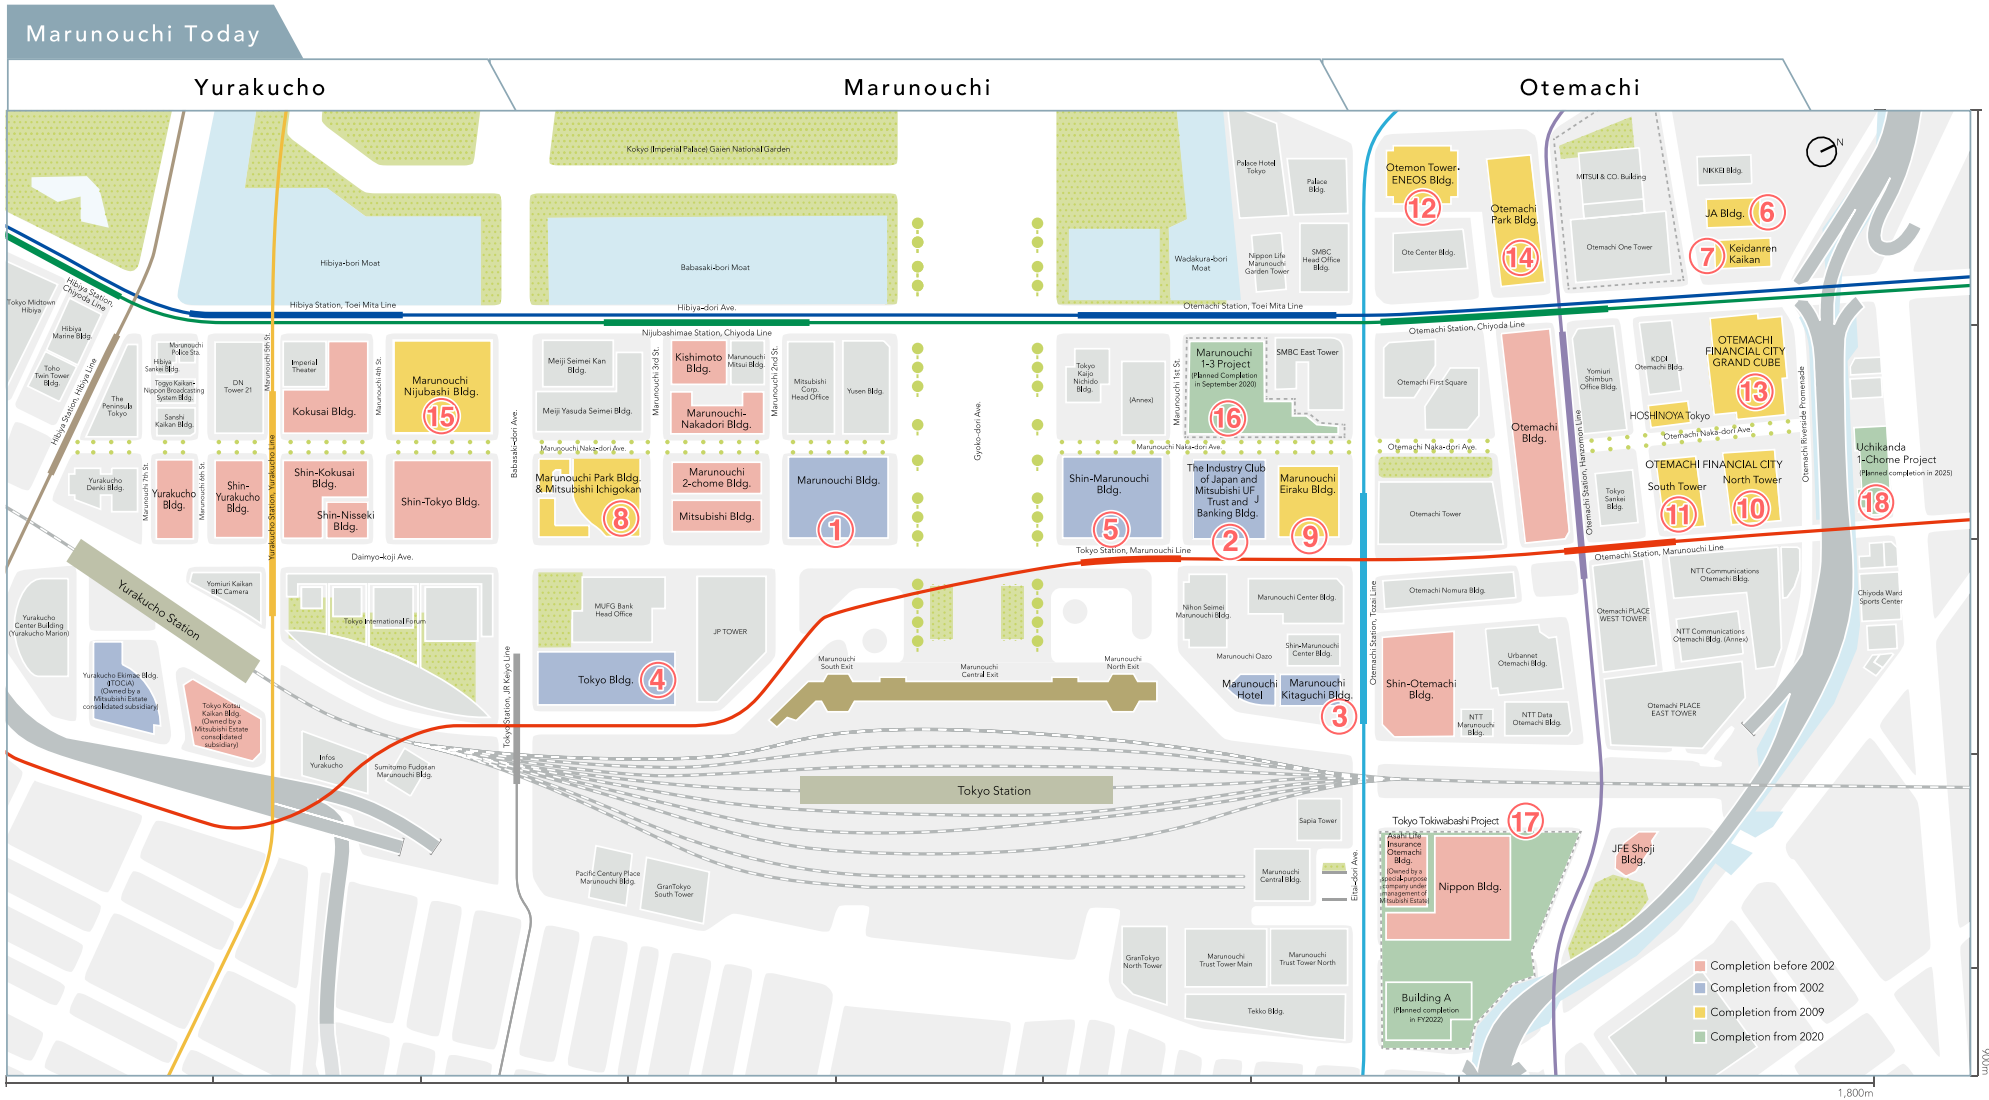

In 1998, Mitsubishi Estate began to work on a project which aimed to create a landscape that would give a new image to the area based on the concept of "The world's most interaction-inspiring neighborhood." Starting with the completion of the Marunouchi Building in 2002, Mitsubishi Estate rebuilt many buildings in line with the new concept. Soon after, we have expanded the vibrant and bustling atmosphere of Marunouchi to Otemachi and Yurakucho, deepening the business function as well as widening the versatility of city function.

2020 –
Marunouchi NEXT Stage
 Focus Shifted to Make the Marunouchi Redevelopment Project Broader and More Comprehensive

Setting the community development from 2020's as the "Marunouchi NEXT Stage", we strive to provide co-creation platform for innovation through companies, employees, and visitors. In addition, as we have set the Yurakucho and Tokiwabashi area as the main redevelopment area, approximately 600 billion to 700 billion yen in total will be invested by 2030 to promote redevelopment and renovation.
